Professional Summary:

Cybersecurity and Full-Stack Developer with experience building and shipping production-grade web applications, secure authentication systems, and AI-integrated platforms. Experienced in building and deploying cross-platform applications on AWS, Android, and iOS with RESTful API and FastAPI integration. Strong background in Python, Java, React, and secure system design, with hands-on experience in access control, encryption, and data protection.

Skills:

- **Languages:** C, Python, Java, JavaScript, TypeScript, HTML, CSS, SQL
- **Frameworks & Technologies:** React, Flutter, FastAPI, Firebase, Node.js, REST APIs, RESTful API Design
- **Tools/Platforms:** Git, MySQL, VMware, VirtualBox, Jupyter Notebook, Linux, Cloudflare, AWS, Android, Apple Developer
- **Domains:** Cybersecurity, Full-Stack Development, Machine Learning, Mobile App Development
- **Security Concepts:** Authentication, Authorization, Encryption, Access Control, Secure Web Applications
- **UI/UX:** Responsive Design, User Interface Design, User Experience Design

Education:

- **B.Tech (2022-26): Computer Science (Cybersecurity)**, Garden City University, Bengaluru **CGPA: 8.87**
- **12th Grade (2022)**, BGS PU College, Bengaluru **71.33%**
- **10th Grade (2020)**, Sri Aurobindo Vidya Mandir, Bengaluru **89.12% (Top 10)**

Experience:

Software Development Intern

MedAiLocker Private Limited

May 2026 - July 2026

- Developed and maintained production web and mobile applications (React + Flutter) for an AI-powered medical records platform serving live users on Android and iOS.
- Built and integrated RESTful APIs and FastAPI-based backend services, implementing end-to-end data flow between frontend and cloud infrastructure on AWS.
- Deployed and managed application builds across Android (Google Play) and Apple Developer platforms, handling release workflows end to end.
- Implemented 10+ UI components and core features including API integrations, form validation, and secure health data workflows.

Cybersecurity Research and Development Intern

Zetpeak

Aug 2025 - Nov 2025

- Completed a 3-month internship focused on cybersecurity research and development.
- Built a cyber-forensic automation tool that reduced manual artifact analysis time by automating processing of 5+ forensic artifact types using industry-standard forensic tools.
- Supported analysis across 2+ investigation datasets, contributing findings to internal research documentation.
- Collaborated with a 3-member team to implement secure application architecture and security best practices.

Projects:

1. **HireAI – AI-Powered Hiring Platform (Live at: hireai-do9.pages.dev)** 2026
 - Architected and shipped a production AI hiring platform serving live users using React, TypeScript, Cloudflare Workers, Firebase, and the Gemini API.
 - Features include dashboard, resume history, credit/plan system, admin panel, and secure user authentication.
 - Integrated PDF parsing, retry logic for API failures, and DPDP-compliant data handling with post-screening deletion.
2. **trustNshare – Secure Sharing Platform (Final Year Project, trustnshare.vercel.app)** 2025 - 2026
 - Built a secure data-sharing platform implementing 3+ role-based access control policies, reducing unauthorized access scenarios to zero in testing.
 - Implemented end-to-end authentication, authorization, and AES-based encryption for secure data storage and transfer.
3. **Phishing Detection Website** 2025
 - Built a web application using 2+ ML classification models to detect phishing websites, achieving 92% detection accuracy on a 2,000+ URL dataset.
 - Reduced false positive rate through feature engineering and model tuning across multiple classifiers.

Certifications & Technical Training:

[View All Certificates](#)

- Cybersecurity & Networking: CCNA (Cisco), Introduction to Cybersecurity (Cisco)
- Ethical Hacking & Penetration Testing – Udemy; Generative AI (IBM); AWS Essentials – Infosys Springboard
- 20+ certifications in networking, cybersecurity, cloud, and secure system design (full list via link above).

Achievements:

- National-level hackathon participant; delivered a functional working prototype under 24-hour constraint.
- Delivered technical talks on IoT in Space Exploration and Threat Hunting in Space.
- Maintained 8.8 CGPA, ranking in the top 15% of the university cohort.
